

AXIS Systems

COMPANY PROFILE

About AXIS Systems

AXIS Systems, founded in the year 2004 is a leading Technology Services and Consulting Company focused on building innovative solutions that address clients' most complex digital transformation needs. As a customer-centric and relationship driven business model, we continually infuse our learning experience to build a high customer satisfaction through a trusted partnership with our customers by providing services that are cost effective with tangible business results.

We Consult, Plan, Design, Implement & Manage Complete IT Solutions & Services for your business.

MISSION

To deliver high-quality IT Solutions and Services with utmost integrity, honesty, and transparency.

VISION

To partner in customer's growth by providing expertise in ICT infrastructure, Information Security and Business Applications. To nurture our people into future technology leaders. To develop the talent pool in the ecosystem that we operate.

VALUES

AXIS Systems believes in unity and works as a team that not just simplifies communication but optimizes the work as well. We understand the complexity in businesses and help clients with flexible solutions.

ICT INFRASTRUCTURE

Maximize the value of ICT infrastructure and cloud with solutions that integrate deep industry insights, leading technologies, and best-in-class execution. Axis Systems depth and breadth in ICT infrastructure and cloud technologies make us the preferred partner in many of our client's digital transformations. Our technology consulting and system integration services have helped our clients drive change through data centre transformation, cloud migration, workplace transformation, network modernization and system integration.

Services

Maintenance

Maintenance contracts are ideal for small/medium-sized businesses that cannot afford to employ a full-time maintenance person. The Maintenance division of AXIS Systems, provides comprehensive Maintenance service for all your maintenance/repair needs, ensuring quality service and peace of mind.

Our Expertise

- **Multifunction Printer, Copier & Plotter**
- **Desktop, Laptop, Server & POS Machine**
- **Managed Print Services**

Consulting

Reimagine your business with a hands-on thought partner to help you define, design, and deliver results. New technologies and business models are driving companies to transform. AXIS System's Consulting practice helps business leaders respond to their customers' needs by driving digital-first transformation: from operations to technologies to people.

Our Expertise

- **Infrastructure & Cloud**
- **Digital Strategy & Transformation**
- **Business Process Management**
- **Cybersecurity & Risk**

Outsourcing

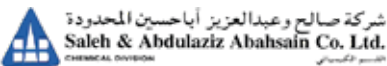

Today Small and medium-sized enterprises (SMEs) companies face great business challenges with relation to IT investment to realize true business value. Managing an ICT Infrastructure without setting up an IT Department, unlocking resources to focus on strategic areas, accessing a broader knowledge base without investing in acquiring resources are essential to managing a business with greater operational freedom and financial agility in such times of change.

Our Managed Services model Focused on reducing operational costs, ensuring maximized availability and performance of your IT investments, we extend you our desktop management, network management, systems & application management and back-up and storage management services.

Our Expertise

- ICT Infrastructure
- Network & Security
- Business Applications
